(54) PICTURE PROCESSING DEVICE, PICTURE PROCESSING METHOD, AND STORAGE MEDIUM THEREFOR

(57)Abstract:

PROBLEM TO BE SOLVED: To make it possible to optimally display a picture related to plural input picture signals.

SOLUTION: The picture processing device is constituted by being provided with an input means for inputting plural systems of picture signals from outside of the device, a picture processing means for processing the plural systems of the picture signals, an output means for outputting the plural systems of the picture signals outputted from the picture processing means to a display device, a storage means for making the plural systems of the picture signals correspond to the processing control information and storing them therein, and a control means for controlling an operation of the picture processing means for processing the plural systems of the picture signals based on the processing control information stored in the storage means.
